

Adi Karisik has over 20 years of highly specialized professional experience, one that covers information technology, cyber security, management consulting, intelligence consulting as well as providing specialized services in Defense and Intelligence domain. He managed several classified and open programs/portfolios in both USA and Europe. During his 14-year tenure with Blue Canopy Group, Mr. Karisik served as a partner and one of the key leaders in National Security domain.

Mr. Karisik's skillset is very colorful, totally not unlike his work experience, and involves behavioral profiling, cultural analysis, political-military advising, combat operations, intelligence training, predictive threat analysis, etc. – just to name a few. He worked in over 80 countries and speaks multiple languages.

His work experience covers variety of organizations in intelligence arena and within Department of Defense, Mr. Karisik is well known within Army, United States Marine Corps and specialized community. He teaches at Naval Post Graduate School in Monterey and has authored several types of training in area of cross-cultural negotiations, predictive behavior analysis, human terrain reading and survivability.

Since 2012 Adi has been involved in big data analytics and has partnered with several US and European companies to provide a product capable of combining big data and machine learning with multiple external data sources, in order to facilitate assistance in area of complex decision-making modeling.

Adi is a passionate pilot, a former nationally ranked NCAA division 1 tennis coach and currently serves as a squadron commander for Civil Air Patrol in Virginia where he volunteers his time to train cadets and fly search and rescue missions.

Adi also serves as a Chairman of the board of the Mansion on O street (Museum, club and hotel – a well-hidden and very popular place in the heart of Washington DC) – since 1980 every US president spends time at the Mansion.

Recently Mr. Karisik worked within Jacobs as a Business Unit Leader for Commercial and International cyber operations and as a deputy BU leader for cyber security operations. In scope of those areas he managed a diverse portfolio of programs and people.
